
The Stem Cell Niche in Development and Disease

Grant Award Details

The Stem Cell Niche in Development and Disease

Grant Type: Conference

Grant Number: CG1-07588

Project Objective: The goal was to speed the development of stem cell-based therapies, transitioning from preclinical models to clinical trials. The Symposium was organized into four sessions around the central theme of understanding the stem cell niche. Three sessions focused on each of the germ layers– ectoderm, mesoderm, and endoderm. A fourth concentrated on translational and clinical applications relevant to each.
